Objective: Backend-focused Software Engineer skilled in PHP (Laravel).

WORK EXPERIENCE

Software Engineer, HRsoftBD
April 2025 - present

Buet Graduet Club-online voting system:	*NorthBangla News Portal :*	*Hotel Management System:*
Developed backend features using Laravel, including session management and OTP-based user validation	Built a robust multi-role admin system with super admin controls and automated vote counting.	Designed and maintained account management and approval workflows with role-based access for backend.

➢ Worked extensively on Laravel-based backend systems, focusing on secure authentication, scalable architecture, and clean API development following OOP and MVC best practices.

Software Engineer Intern, Quark Force Technology
October 2024 - February 2025

Developed dashboards, authentication, APIs, and backend logic using PHP Laravel, Vue.js, OOP, and RESTful principles. Implemented asynchronous request handling and version control via Git, also BPO operations.

Business Process Outsourcing (BPO) Analyst, Quark Force Technology
April 2024 - September 2024

Managed customer service, order resolution, and data analysis for **eBay**, **Walmart**, and **Amazon**. Supported data-driven decision making and collaborated in a fast-paced team environment.

Cyber Security Center DIU
February - July 2021

I've completed a workshop on CEH, offered by Cyber Security Center (DIU). There also had a research opportunity, Data Process, Data Manage and more.

Professional Development Udemy
November 2023 - March 2024

Certified Project Development Based on Java course on udemy.
